You're invited to a Face-to-Face Aluminar

Monday 16th March 2026, 12 midday

RCH Foundation, 2nd Floor, 48 Flemington Road

“Taking Precision Medicine to New Heights”

With A/Professor Andrew J. Kornberg

A/Prof Andrew Kornberg trained as a paediatric neurologist and completed a Neuromuscular Fellowship working with Dr Alan Pestronk in St Louis, USA.

He has had laboratory and clinical experience in a variety of immune-mediated neurologic syndromes, as well as the neurological aspects of metabolic diseases. He provides care to many children with rare, genetic disorders.

Andrew has two passions- helping sick kids and flying. In July 2025 he embarked on a flight circumnavigating Australia to raise \$4.5 million for the Royal Children's Hospital (RCH) for a dedicated Advanced Therapy Centre at RCH.

He will share the story of his trip including why advanced therapies are important for children with rare and complex conditions.

You are warmly invited to join us for lunch (\$25/person) following the talk – RSVP by **6th March** if joining us for lunch. Parking beneath the building is reached via Entry no 4 in Flemington Rd or kerb side parking may be available along Flemington Rd or Chapman St.
